Summary

Computer Science student and aspiring Software Engineer with hands-on experience in frontend development, backend architecture, and cloud security. Passionate about building real-world applications, rapidly learning new technologies, and delivering clean, user-focused solutions. Strong collaborative skills with a proven ability to solve complex problems and manage project life cycles effectively.

Key Highlights

- Proficient in Python for backend development and algorithmic problem-solving.
- Strong understanding of Relational Databases (SQL) and NoSQL (MongoDB).
- Hands-on experience with Flask framework.
- Active competitive programmer with a focus on Data Structures and Algorithms (DSA).

Technical Skills

- Languages:** Python, JavaScript, SQL, HTML, CSS
- Web Technologies:** HTML5, CSS3, Bootstrap, Responsive Design
- Developer Tools:** Git, GitHub, VS Code, Linux

Projects

Medical Chatbot: AI-Powered Virtual Assistant *Python, Flask, NLP*

- Developed a virtual assistant using NLP for real-time patient interaction and query resolution.
- Designed conversational flows to handle dynamic user inputs and provide accurate responses.

SmartKisan: Agricultural Technology Platform *Full-Stack Development*

- Built a digital platform delivering data-driven agricultural guidance to farmers and rural youth.
- Integrated real-time data processing and a user-friendly UI to improve rural accessibility.

Education

Bachelor of Technology (Computer Science) *Sanjay Ghodawat Institute*

Certifications

- Python Programming - Skill India
- Python for Data Science - IBM
- Generative AI - Microsoft
- Microsoft 365 Copilot - Microsoft
- Prompt Engineering - IBM
- Web Design & Development - Skill India

Internships

Python AI & ML *Internship*

- Gained practical exposure to Python-based machine learning models and data preprocessing.
- Implemented and analyzed various model evaluation techniques.

Professional Skills

- Problem Solving, Team Collaboration, Time Management, Quick Learner
